1.	drawings for model:	s of Diesel engine castings fo	50X1-HU unn-Allee 72, is furnishing the or the Soviets. It is intended th, who is at present at Tushim	, ,
	near Moscow, furnis	shed the original drawings for	the component castings,	
2.	These Retter and Control of the Research and Hodeling sub-contractors; all	shed the original drawings for o. drawings are passed to Mode au Harzenrode. Each of these Itogether almost 100 firms col contract is between 7 and 8 m	The component castings, Illian Wernigerode, Nodeliban principal firms has several Laborate in this work. The fillion RM, counting against	1-HU
2.	These Retter and Control of Dessau, and Modeling sub-contractors; altotal value of the reparations. At first, four companying, were order however, insisted of October 19/8 and of approximately 12	shed the original drawings for o. drawings are passed to Mode an Horzerode. Each of these ltogether almost 100 firms col- contract is between 7 and 8 m plete rets of models, each for red to be completed by the end on the completion of two completion of two completes sets of models 20 to 140 b.h.p. to be finished	The component castings. The Vernigerode, Nodeliban principal firms has several laborate in this work. The villion RM, counting against 50X The A-cylinder 80 b.h.p. Diesel of 1948. The Soviets have now, ete sets of models by the end of a 6-cylinder Diesel engine	1-HU
	Thece Retter and Contessau, and Modeling sub-contractors; altotal value of the reparations. At first, four companying uere order however, insisted of October 1978 and of approximately 12 latter order takes. A Soviet civil engine taking delivery wernigerode, and in models has been delivered to the second of	shed the original drawings for o. drawings are passed to Mode au Marzerode. Each of these ltogether almost 100 firms col- contract is between 7 and 8 r plete rets of models, each for red to be completed by the end on the completion of two comple it two complete sets of models 20 to 140 b.h.p. to be finished precedence over the second pa- inear, Ulyanov, who arrived fr personally of every part deli- iteds to stay in Germany unti-	the component castings. Illian Mernigerode, Modeliban principal firms has several laborate in this work. The fillion RM, counting against 50X a 4-cylinder 80 b.h.p. Diesel of 1948. The Soviets have now, ete sets of models by the end of a 6-cylinder Diesel ongine of by the end of 1949. This	1-HU
3.	Thece Retter and Contessau, and Modeling sub-contractors; altotal value of the reparations. At first, four companying uere order however, insisted of October 1978 and of approximately 12 latter order takes. A Soviet civil engine taking delivery wernigerode, and in models has been delivered to the second of	shed the original drawings for o. drawings are passed to Mode an Marzarode. Each of these ltogether almost 100 firms col- contract is between 7 and 8 a plete rets of models, each for red to be completed by the end on the completion of two completion of two complete it two complete sets of models precidence over the second pa- tinear, Ulyanov, who arrived framer, Ulyanov, who arrived framer, until itered and shipped. Certain	The component castings. Illian Mernigerode, Modeliban principal firms has several laborate in this work. The fillion RM, counting against 50X a 4-cylinder 80 b.h.p. Diesel of 1948. The Soviets have now, ete sets of models by the end of a 6-cylinder Diesel engine of by the end of 1949. This ir of 4-cylinder Diesel models. The Moscow in early April 1948, wered in Dessau, Herzgerode or 1 the first pair of 4-cylinder	1-HU
3.	Thece Retter and Contessau, and Modeling sub-contractors; all total value of the reperations. At first, four companying, were order however, insisted of October 1948 and of approximately 12 latter order takes. A Soviet civil engine taking delivery wernigerode, and in models has been delicationed to Moscow to the position of the ped to Moscow to the ped to the ped to Moscow to the ped	shed the original drawings for the original drawings are passed to Mode on Harronde. Each of these stops the almost 100 firms collected to be completed by the end on the complete sets of models precedence over the second passed to be complete sets of models precedence over the second passed. Ulyanov, who arrived for personally of every part deligited to stay in Germany until tiered and shipped. Certain was Stettin by Derutra.	The component castings. The Vernigerode, Nodelibau principal firms has several laborate in this work. The illion RM, counting against 50X The a 4-cylinder 80 b.h.p. Diesel of 1948. The Soviets have now, ete sets of models by the end of a 6-cylinder Diesel engined by the end of 1949. This ir of 4-cylinder Diesel models. The Moscow in early April 1948, wered in Dessau, Harzgerode or I the first pair of 4-cylinder small parts have already been	1-HU
3.	Thece Retter and Contessau, and Modeling sub-contractors; all total value of the reparations. At first, four companying, were order however, insisted of October 1948 and of approximately 12 latter order takes A Soviet civil engine taking delivery Mernigerode, and in models has been delicational to Moscow to the Change of Dechassi	shed the original drawings for the original drawings for the original drawings for the original drawings for the drawings are passed to Mode and Horzentode. Each of these almost 100 firms collected as between 7 and 8 reports to be completed by the end on the complete sets of models are decreased by the presidence over the second particular to stay in Germany until the day of every part deligitated and shipped. Certain of Stettin by Derutra.	The component castings. Illian Mernigerode, Modeliban principal firms has several laborate in this work. The fillion RM, counting against 50X a 4-cylinder 80 b.h.p. Diesel of 1948. The Soviets have now, ete sets of models by the end of a 6-cylinder Diesel engine of by the end of 1949. This ir of 4-cylinder Diesel models. The Moscow in early April 1948, wered in Dessau, Herzgerode or 1 the first pair of 4-cylinder	1-HU
3.	Thece Retter and Control of Dessau, and Modelia sub-contractors; all total value of the reperations. At first, four companying, were order incompanied to the control of October 1948 and of approximately 12 latter order takes A Soviet civil engine taking delivery Wernigerode, and is models has been delicationed to Moscow to the Change of Declassication of Declassicatio	shed the original drawings for the original drawings for the contract is between 7 and 8 replete rets of models, each for the contract is between 7 and 8 replete rets of models, each for the complete sets of models are two complete sets of models preordence over the second particles. Ulyanov, who arrived from the complete sets of models preordence over the second particles to stay in Germany untilitiered and shipped. Certain with Stettin by Derutra.	The component castings. The Vernigerode, Modeliban principal firms has several laborate in this work. The fillion RM, counting against 50X The A-cylinder 80 b.h.p. Diesel of 1948. The Soviets have now, at each of a 6-cylinder Diesel ongine of a 6-cylinder Diesel ongine of by the end of 1949. This ir of 4-cylinder Diesel models. The Moscow in early April 1948, wered in Dessau, Herzgerode or 1 the first pair of 4-cylinder small parts have already been	
3.	Thece Retter and Control of Dessau, and Modelia sub-contractors; all total value of the reperations. At first, four companying, were order incompanied to the control of October 1948 and of approximately 12 latter order takes A Soviet civil engine taking delivery Wernigerode, and is models has been delicationed to Moscow to the Change of Declassication of Declassicatio	shed the original drawings for the original drawings for the original drawings for the original drawings for the drawings are passed to Mode and Horzentode. Each of these almost 100 firms concentrated is between 7 and 8 reported to be completed by the end on the complete sets of models are of two complete sets of models precodence over the second particles. Ulyanov, who arrived from personally of every part delimited to stay in Germany untilitered and shipped. Certain of Stettin by Derutra.	The component castings. The Vernigerode, Modelibau principal firms has several Leborate in this work. The fillion RM, counting against 50X The A-cylinder 80 b.h.p. Diesel of 1948. The Soviets have now, etc sets of models by the end of a 6-cylinder Diesel engine of by the end of 1949. This ir of 4-cylinder Diesel models. The Moscow in early April 1948, wered in Decsau, Harzgerode or 1 the first pair of 4-cylinder small parts have already been 50X1	
3.	Thece Retter and Control Dessau, and Modeling sub-contractors; all total value of the reperations. At first, four companying, were order however, insisted of October 1948 and of approximately 12 latter order takes A Soviet civil engine taking delivery Wernigerode, and in models has been delicationed to Moscow to the Change of Declassic Class.	shed the original drawings for the original drawings for the contract is between 7 and 8 replete rets of models, each for the contract is between 7 and 8 replete rets of models, each for the complete sets of models are two complete sets of models preordence over the second particles. Ulyanov, who arrived from the complete sets of models preordence over the second particles to stay in Germany untilitiered and shipped. Certain with Stettin by Derutra.	The component castings. The Vernigerode, Modelibau principal firms has several Leborate in this work. The fillion RM, counting against 50X The A-cylinder 80 b.h.p. Diesel of 1948. The Soviets have now, etc sets of models by the end of a 6-cylinder Diesel engine of by the end of 1949. This ir of 4-cylinder Diesel models. The Moscow in early April 1948, wered in Decsau, Harzgerode or 1 the first pair of 4-cylinder small parts have already been 50X1	
3.	Thece Retter and Contents and Modelia sub-contractors; all total value of the reperations. At first, four communities, were order incomment of approximately 12 latter order takes A Soviet civil engine taking delivery wernigerode, and is models has been delicationed to Moscow to the Change of Declassic Class.	shed the original drawings for the original drawings for the contract is between 7 and 8 replete rets of models, each for the contract is between 7 and 8 replete rets of models, each for the complete sets of models are two complete sets of models preordence over the second particles. Ulyanov, who arrived from the complete sets of models preordence over the second particles to stay in Germany untilitiered and shipped. Certain with Stettin by Derutra.	The component castings. The Vernigerode, Modeliban principal firms has several laborate in this work. The fillion RM, counting against 50X The A-cylinder 80 b.h.p. Diesel of 1948. The Soviets have now, at each of a 6-cylinder Diesel ongine of a 6-cylinder Diesel ongine of by the end of 1949. This ir of 4-cylinder Diesel models. The Moscow in early April 1948, wered in Dessau, Herzgerode or 1 the first pair of 4-cylinder small parts have already been	1-HU
